

Humic Solutions for LIFE.

THE BIOAG EQUATION

A **SUPERIOR SOURCE** of humic acid, extracted from **fossilized fresh water deposits** that have been protected by a layer of sandstone.

REVOLUTIONARY (proprietary) methods that assure **HIGH BIOAVAILABILITY**.

OVER FORTY YEARS EXPERIENCE using humic substances, promoting sustainability around the world.

DEMONSTRATED RESULTS!

KEY BENEFITS

Nutrient Chelation, Retention & Increased Availability = REDUCED Fertilizer Inputs

Increases growth and yield

Conditions the soil

Adventitious root growth for new and established plants

Increases crop uniformity and early ripening

Environmental stress relief including drought tolerance

Stimulates enzyme production in plants and microorganisms

Builds immunity

Promotes seed germination rate & vigor

Stimulates microbial activity

Easy to use!

Our products are certified for use in ORGANIC FARMING by GOCA (Guaranteed Organic Certifying Agency)

WHAT ARE HUMIC SUBSTANCES?

Humic substances are the building blocks of our world and crucial to life on earth. They provide a biochemical bridge between mineral and living plant matter. Humic substances are energy rich matter that increase microbial growth and biochemical interactions; such as carbon and nitrogen cycles and creation of other phytostimulants. They are most responsive in high carbohydrate crops like potato, sugar

beet, tomato, carrot, fruits of all types, barley, maize, wheat and rice. Also great for turf and lawn management.

*Custom manufacturing available for bulk orders.

see the **DIFFERENCE** using our alternatives to toxic technologies!

HumiSolve USA Humic Acid Concentrate--A top quality HUMIC & FULVIC product that is easy to apply, highly effective, and readily available. HumiSolve is manufactured via a unique dry-to-dry manufacturing process that naturally preserves the integrity of the source material. It's been shown to improve soil health, increase nutrient uptake and reduce fertilizer inputs. A soluble product that comes in dry powdered or granulated form for easy shipping and long-term storage. Use in a wide variety of applications including dry broadcast for farms and turf, or add to liquid for foliar, hydroponic or irrigation applications. Use as a seed treatment, for clones/cuttings and for compost tea activation.

CytoPlus Humic Acid Concentrate with Micronutrients--A combination of HUMIC & FULVIC EXTRACT from Norway and other natural sources, an excellent source of beneficial micronutrients, as well as humic acids. Use in a wide variety of applications including dry broadcast for farms and turf, or add to liquid for foliar, hydroponic or irrigation applications. Use for compost tea activation.

TM-7 Humic Acid Concentrate with Micronutrients--All the power of HumiSolve humic and fulvic acids plus SEVEN MICRONUTRIENTS and beneficial rare elements required for plant growth. Increase fruit set and quality, soil tilth, trace element levels and reduce water use. Use in a wide variety of applications including dry broadcast for farms and turf, or add to liquid for foliar, hydroponic or irrigation applications. Fantastic when used for compost tea activation.

CytoPlusTM
Humic Acid Concentrate
Seaweed & Fulvic

Concentrate with Seaweed and
tion of SOLUBLE SEAWEED
our TM-7 powder. CytoPlus is
cial organic compounds, seven
mic and fulvic acids. Use in a
cluding dry broadcast for farms
foliar, hydroponic or irrigation
t tea activation.

Ful-Power Fulvic Acid (humic acid extract)--BioAg's
PREMIUM GOLDEN ISOLATE is preferred by growers
because of it's supreme chelating action, high bioavailability
and superior biological stimulation effects. Our unique cold-
microbial extraction method mimics the earth's natural
processes, preserving the integrity of the original source, while
producing a concentrated isolate. Often referred to as the
champagne of humic acids, Ful-Power is an excellent choice
for all applications including irrigation, foliar sprays, clones/
cuttings, bare-root dips, seed activation and hydroponics.

VAM & Activator--Humic and fulvic acids, micronutrients and BENEFICIAL
FUNGI all-in-one. For easy application of vesicular-arbuscular mycorrhizal
(VAM) fungi resulting in increased plant and root growth. Humic substance
and the beneficial trace elements provide food for the mycorrhizae, which in
turn enhance the activity of the root system. Use in a variety of applications
including dry broadcast for farms and turf, seed coat, root dip or hydroponic
applications. Use for seed treatments, rooted clones/cuttings, or fortification
after making compost tea.

AT THE HEART OF IT

“Our management philosophy is simple and is an integral part of our values: Doing things right the first time (Kina’ole).” --Dr. Robert Faust, Founder/President

Faust Bio-Agricultural Services, Inc. is a world leader in the technology and application of humic substances, with over forty years of international experience. We understand the needs of today’s farmer.

BioAg was founded in 1981 by Founder/President Dr. Robert Faust, an internationally renowned pioneer in the use of humate derivatives; including fulvic and humic acids for crops, human health and environmental applications. Dr. Faust’s humate research began in the late 60s when only a handful of companies realized the potential of humate derivatives. Today, we specialize in humic substances, sourced from the best deposits, and developed using our proprietary extraction technology. This technology ensures our product has high bioavailability.

Our company principals are scientists whose areas of expertise include plant and soil sciences, biochemistry and research & development of sustainable products for agriculture and the environment.

BioAg is among a growing number of individuals, organizations and product suppliers that are striving to make a difference through stewardship. We offer products, services and information that improve how we interact with nature and the environment.

BioAg is a proud and active member of the International Humic Substance Society (IHSS). We use IHSS standard analytical methods including column chromatography using XAD-8 resin. We stand behind all of our products and services with a no excuse guarantee.

FOUNDER AND PRESIDENT

Dr. Robert Faust --M.S. Ph.D.
DrFaust@BioAg.com

Agronomy, Integrated Pest Management Advisor/Agroecologist

Dr. Robert Faust is Founder & President of Faust Bio-Agricultural Services, Inc., with over 40 years of agricultural experience in research and extension services, farming, product and program development and consulting. Dr. Faust has helped to develop several commercial biopesticides and performed large-scale farm applications and efficacy research for registration of biopesticides. He is a leading expert in agroecology, providing integrated services throughout the world including the United States, Egypt, Belize, Jamaica and Mexico. He assists in reducing dependency on chemical fertilizers and pesticides using new biotechnology and foliar fertilizers to increase crop yields and create sustainable systems.

RESEARCH AND DEVELOPMENT

Ryan Zadow
Ryan@BioAg.com

Biochemistry, Fertilizer and Supplement Development, Hydroponic Consultant

Ryan Zadow has ten years experience in R&D, specializing in fertilizer and supplement formulation for hydroponic and soil applications. He has served as a freelance consultant for small growers and developed organic products for large soil and soil-less farming applications throughout the Northwest. Ryan's specific interest is in the world of humic substances where he sees great potential for use in sustainable agriculture.

ADMINISTRATIVE MANAGER AND ACCOUNTING

Carly Faust
Carly@BioAg.com

Carly is the backbone of BioAg and has been working alongside Dr. Faust since its founding. Her knowledge, service and patience are immeasurable.

MARKETING AND COMMUNICATIONS

Shelby Zadow
Shelby@BioAg.com

Shelby came to us in 2008 from the wine industry. She has five years experience in marketing, public relations and communications with a focus in sustainable and organic agriculture.

Humic Solutions for *LIFE*.

"Being in the business to sell and apply soil amendments and fertilizers, I found no other product that equals the all around quality and performance of HumiSolve." --**John M. Beurger, ALPHA Natural Inc.**

"I recently ordered the HumiSolve from you and had outstanding results. I've told several people about your product and website and will continue to do so. Again, the results are amazing!" --**Ed Hawkins, Junglemania**

WHAT OUR CLIENTS SAY...

"We did some germ tests on untreated organic seed corn with Cytoplus at NC+ Hybrids in Lincoln, Nebraska. We chose a low germinating seed lot and the untreated control had 57% cold germination. Cytoplus had 86% germination. The people in the seed lab at NC+ were impressed."
--**Joel Hastings, NC+ Hybrids Seed Company**
