

see the **DIFFERENCE!** *Not all Humic products are equal!*

Ful-Power Fulvic Acid (golden humic)

--BioAg's PREMIUM FULVIC ISOLATE is preferred by growers because of its supreme chelating action, high bioavailability and superior biological stimulation effects. Our unique cold-microbial fermentation method mimics the earth's natural processes, preserving the integrity of the original source, while producing a concentrated pure fulvic. Often referred to as the champagne of humic acids, Ful-Power is an excellent choice for all applications including irrigation, foliar sprays, clones/cuttings, bare-root dips, seed activation and hydroponics.

Ful-Humix Humic & Fulvic Acid Concentrate

--A top quality HUMIC & FULVIC product that is easy to apply, highly effective, and readily available. Ful-Humix is made via a unique dry-to-dry manufacturing process that naturally preserves the integrity of the source material. It's been shown to improve soil health, increase nutrient uptake and reduce fertilizer inputs. A soluble product that comes in dry powdered or granulated form for easy shipping and long-term storage. Use in a wide variety of applications including dry broadcast for farms and turf, or add to liquid for foliar, hydroponic or irrigation applications. Use as a seed treatment, for clones/cuttings and for compost tea activation.

TM-7 Humic & Fulvic Acid Concentrate with Micronutrients

--All the power of Ful-Humix humic and fulvic acids plus SEVEN MICRONUTRIENTS and beneficial rare elements required for plant growth. Increase fruit set and quality, soil tilth, trace element levels and reduce water use. Use in a wide variety of applications including dry broadcast for farms and turf, or add to liquid for foliar, hydroponic or irrigation applications. Fantastic when used for compost tea activation.

CytoPlus Humic & Fulvic Acid Concentrate with Seaweed and Micronutrients

--A combination of SOLUBLE SEAWEED EXTRACT from Norway and our TM-7 powder. CytoPlus is an excellent source of beneficial organic compounds, seven micronutrients, as well as humic and fulvic acids. Use in a wide variety of applications including dry broadcast for farms and turf, or add to liquid for foliar, hydroponic or irrigation applications. Use for compost tea activation.

Ful-Humix and Ful-Power are OMRI listed.
All products meet NOP standards.
