

AT THE HEART OF IT

“Our management philosophy is simple and is an integral part of our values: Doing things right the first time (Kina’ole).” --Dr. Robert Faust, Founder/President

Faust Bio-Agricultural Services, Inc. is a world leader in the technology and application of humic substances, with over forty years of international experience. We understand the needs of today’s farmer.

BioAg was founded in 1981 by Founder/President Dr. Robert Faust, an internationally renowned pioneer in the use of humate derivatives; including fulvic and humic acids for crops, human health and environmental applications. Dr. Faust’s humate research began in the late 60s when only a handful of companies realized the potential of humate derivatives. Today, we specialize in humic substances, sourced from the best deposits, and developed using our proprietary extraction technology. This technology ensures our product has high bioavailability.

Our company principals are scientists whose areas of expertise include plant and soil sciences, biochemistry and research & development of sustainable products for agriculture and the environment.

BioAg is among a growing number of individuals, organizations and product suppliers that are striving to make a difference through stewardship. We offer products, services and information that improve how we interact with nature and the environment.

BioAg is a proud and active member of the International Humic Substance Society (IHSS). We use IHSS standard analytical methods including column chromatography using XAD-8 resin. We stand behind all of our products and services with a no excuse guarantee.

FOUNDER AND PRESIDENT

Dr. Robert Faust --M.S. Ph.D.
DrFaust@BioAg.com

Agronomy, Integrated Pest Management Advisor/Agroecologist

Dr. Robert Faust is Founder & President of The BioAg Corporation with over 40 years of agricultural experience in research and extension services, farming, product and program development, and consulting. Dr. Faust has helped to develop several commercial biopesticides and performed large-scale farm applications, and efficacy research for registration of biopesticides. He is a leading expert in agroecology, providing integrated services throughout the world including the United States, Egypt, Belize, Jamaica and Mexico. He assists in reducing dependency on chemical fertilizers and pesticides using new biotechnology and foliar fertilizers to increase crop yields and create sustainable systems.

RESEARCH AND DEVELOPMENT

Ryan Zadow
Ryan@BioAg.com

Biochemistry, Fertilizer and Supplement Development, Hydroponic Consultant

Ryan Zadow has ten years experience in R&D, specializing in fertilizer and supplement formulation for hydroponic and soil applications. He has served as a freelance consultant for small growers and developed organic products for large soil and soilless farming applications throughout the Northwest. Ryan's specific interest is in the world of humic substances where he sees great potential for use in sustainable agriculture.

ADMINISTRATIVE MANAGER AND ACCOUNTING

Carly Faust
Carly@BioAg.com

Carly is the backbone of BioAg and has been working alongside Dr. Faust since its founding.

MARKETING AND COMMUNICATIONS

Shelby Zadow
Shelby@BioAg.com

Shelby came to us in 2008 from the wine industry. She has five years experience in marketing, public relations and communications with a focus in sustainable and organic agriculture.
