

# Ful-Power Golden Rules!

- ✓ Ful-Power golden humic may increase the uptake of nutrients . CA and OR do not allow any other claims besides the previous. We highly encourage all humic substance users to research the available scientific literature.
- ✓ Ful-Power is an excellent foliar spray .
- ✓ Ful-Power golden humic is compatible with any system, is soluble in ALL pH ranges and compatible with all fertilizers (unlike black/brown humic liquids)!
- ✓ Ful-Power is brewed in small batches, each taking 3 months to make.
- ✓ The unique cold-microbial process mimics the earth's natural processes resulting in a product that is a true isolate and not a fulvate (salt).
- ✓ No chemicals, preservatives or acids are ever used to make Ful-Power, it is 100% natural.
- ✓ Ful-Power is listed by OMRI and all BioAg products meet NOP standards.
- ✓ Ful-Power is made by humic scientists with over half a century combined experience working with humic acids.
- ✓ Ful-Power is made with superior raw sources, sourced from the U.S. (not China)
- ✓ Ful-Power is stable over long periods and won't degrade on the shelf.
- ✓ Humic substances are considered natural and safe by the EPA, safe enough to eat (we sell human grade too!).
- ✓ In OR and CA the state fertilizer registration departments put fulvic acid, ulmic and others under the same umbrella as humic, but our Ful-Power humic acid is purely the low-molecular-weight portion.
- ✓ Ful-Power is made in Independence, OR and is a 100% U.S. manufactured product made by a family owned business.

This informational material is compliant with OR and CA department of agriculture labeling requirements for humic substances, and is intended for customers in these states. For customers in the other states additional materials can be found on our website.
