

HumiSolveTMUSA

Humic Acid Concentrate

Approved for use in Organic Agriculture

HumiSolve USA Humic Acid Concentrate

Our high tech revolutionary processing and LOW HEAT CAPACITY DRYING concept provides a natural, easy to use humic and fulvic concentrate with a high bio-stimulation effect. HumiSolve is sourced from ancient fresh water humus deposits that have been protected by a layer of sandstone and have not been weatherized.

HumiSolve is an inexpensive soil activator. It is a soluble product that comes in dry powdered or granulated form for easy shipping and long-term storage (liquid humates degrade over time).

General Applications Rates:

Seed activation: For vegetable seeds soak 72 hours at 0.5g /gal. For other, soak for 24 hours at same ratio.

Soil and Container plants: 0.5-1g/gal of irrigation solution.

Hydroponic: 0.5g/gal of nutrient solution used in reservoir (use with every change. Top-offs can be chared with 1/4-1/2 normal rate).

Foliar Rates: .25g/gal every 7-10 days.

Field Use: 2-4 pounds per acre every 3-6 weeks.

Pre-Plant Soil Conditioning/Bioremediation: 5-10 pounds per acre.

Non-plant food ingredients: 57% Humic Acid, 12% Fulvic Acid

1/4 tsp=0.5g 1/2tsp=1g

*Please note approx **10% is insoluble** and can be cast in compost or garden. Exceeding application rates can cause irregular growth. Store dry and away from excessive heat.

Superior Source + Revolutionary Methods+ Decades of Experience = Results

Applications:

Soil Systems

Irrigation/Injectors

Hydroponics

Hand Watering

Seed Treatment

Foliar Sprays

Clones/Cuttings

Compost Tea Activation
