

VAM-ENDO MIX™

ENDOMYCORRHIZAL PLANT FOOD
AND SOIL INOCULANT

VAM-ENDO-Mix™ is a blend of seven beneficial endo-associating species of mycorrhizae fungi cultivated on live roots (in vivo), plus our humic acids. This innovative mix improves the rate of transplant success, promotes early establishment, and may improve the absorption of water and nutrients.

AUXILIARY BIOTIC SOIL AND PLANT SUBSTANCE
CONTAINS NON-PLANT FOOD INGREDIENTS

ACTIVE INGREDIENTS

Rhizophagus intraradices	104 propagules/gm
Septogloium deserticola	9 propagules/gm
Claroideogloium etunicatum	9 propagules/gm
Rhizogloium clarum	9 propagules/gm
Claroideogloium claroideum	9 propagules/gm
Funneliformis mosseae	9 propagules/gm
Gigaspora albida	9 propagules/gm

DIRECTIONS FOR USE:

Greenhouse & Indoor Production:

PROPAGATION: Root dip: 1 to 2 oz. per gal

Field Application:

SOIL FERTILITY: 3 to 12 lbs. per acre

SOIL MIXING: 1 to 2 lbs./cubic yard

LAWN & GARDEN: 2 to 4 oz per 1,000 sq ft

IN SEED: 1/4 to 1/3 lb per 100 lb of seed

1/4 tsp = 1 g, 1/2 tsp = 2 g - Perform jar test prior to use.

GENERAL INFO: For proper agronomic application rates for your crop, soil type, and climate please consult with a local crop advisor, farm advisor or agronomist.

Information regarding the contents and levels of metals in this product is available on the internet at: <https://www.aapfco.org/metals.html>

NOTE: This product can be used to inoculate roots of most agricultural crops. Whitish growth is possible and does not compromise efficacy. For more info visit: www.BioAg.com

STORAGE: Store in cool, dry environment. Keep product in sealed container away from moisture.

CAUTION NOTICE: Buyer assumes all risk for use not in accordance with labeled directions. Harmful if swallowed. Avoid contact with skin, eyes, open cuts, and sores. Wash hands after use.
