

BIO-SUPERSIL™

Nanostructured Soluble Silicon

CONTAINS NON-PLANT FOOD INGREDIENTS.

0.5%... SOLUBLE SILICON (Si)

Derived from: Synthetic Amorphous Silica

Directions for Use:

GREENHOUSE/INDOOR PRODUCTION:

Soil/Soilless/Hydroponics:

15-30 ml/gal (1:100 to 1:300 dilution)

Compost Tea:

15-30 ml/gal (1:100 to 1:300 dilution)

Foliar Sprays:

15-30 ml/gal (1:100 to 1:300 dilution)

FIELD APPLICATION:

Soil Fertility:

16 fl. oz to 4 gal/acre

Foliar-General Fertilizer:

16 fl. oz to 1 gal/acre

Lawn & Garden:

1/3 to 1 fl. oz/gal. (1:100 to 1:300 dilution)

Appx 30 mL = 1 fl. oz.

DO NOT FREEZE. SHAKE WELL.

GENERAL INFO: Bio-SuperSil can be tank mixed with most pesticides and fertilizers. Perform a jar test prior to tank mixing. It can be applied to all crops including trees, vines, ornamentals, small fruits, vegetable, row crops, field crops, forage, and pasture. Bio-SuperSil can be applied to the soil by spray broadcasting, in-turrow, as a side dress, via center pivot, and through drip irrigation.

For proper agronomic application rates for your crop, soil type, and climate please consult with a local crop advisor, farm advisor or agronomist. Information regarding the contents and levels of heavy metals in this product is available on the internet at: <http://www.apfco.org/metals.html>

Storage: Store in cool, dry environment. Keep product in sealed container away from moisture.

Notice: Buyer assumes all risk for use not in accordance with labeled directions.

Caution Statement: Harmful if swallowed. Avoid contact with skin, eyes, open cuts, and sores. Wash hands after use.

NANOSTRUCTURED
SOLUBLE SILICON

SILICA

STRUCTURE & STRENGTH

Bio-SuperSil mimics the silica found in nature but with enhanced benefits. It's a novel formulation using non-ionic, nanostructured silica. Nanostructured per ISO/TS 80004-2:2015.

Silicon is important for plant health, and helps with strengthening and promotion of upright structure.

Bio-SuperSil's formulation makes it both highly effective and easy to use because it has a lower pH. Lower pH allows users to blend it seamlessly with water or fertilizer without drastically increasing the pH of a solution.

Bio-SuperSil is recommended for use in drip or pivot irrigation, for foliar sprays, at planting and in hydroponic systems. Bio-SuperSil can be used on all crops and in combination with most organic and synthetic fertilizers.

Application rates will vary by your crop system. Please contact the BioAg sales team or your local crop advisor for further details.
